

CPT_S 483 Intro to Algorithmic Robotics
Fall 2024
Worksheet 07: Motion Planning

Name:

Date:

Problem 1. Given ρ_1 and ρ_2 are both metric functions for some metric space Q . Prove that $c_1\rho_1 + c_2\rho_2$ is also a metric function for Q , where c_1 and c_2 are positive constants. Is it still true when c_1 and c_2 are negative constants?

Problem 2. Extend the RRT. Use $(1.2, 1.2)$ and $(1.5, .3)$ as the next random points.
